

Case study

Transport Museum, Bury

Transport Museum, Bury

Key facts:

Location: Bury

Client: Bury Council /East Lancashire Railway Trust

Sector: Leisure

Status: Complete

Area: 2,005 sqm

Brock Carmichael have converted the Grade II Listed Castlecroft Goods Shed to provide a permanent home for a fantastic collection of transport artifacts.

This painstaking restoration and remodelling of this fascinating piece of british industrial heritage, located in Bury Town Centre, now provides a museum and integrated site for use by both Bury Metropolitan Borough Council and the East Lancashire Railway Trust. The implementation followed the preparation of a Conservation Plan, Options Appraisal and Restoration/Development Plan for the site.

The project also included securing Planning Approval and Listed Building Consent for the restoration/conversion of the Grade II listed goods warehouse at Summerseat to provide live work / residential units for sale.

This £3.5M project was funded by £1.9M worth of Heritage Lottery Funding and £1.6M of match funding from key stakeholders.
